

## [Q82-Q99 Huawei H12-311-ENU Practice Verified Answers - Pass Your Exams For Sure! [2022]

### **Huawei H12-311-ENU Practice Verified Answers - Pass Your Exams For Sure! [2022]**

Valid Way To Pass HCIA-WLAN's H12-311-ENU Exam

#### **NEW QUESTION 82**

If you want to get better covered effect, you should enable the AP signal ( ) through the wall.

- \* vertical
- \* parallel
- \* 45°
- \* 60°

#### **NEW QUESTION 83**

In the 802.1 X protocol, you must have ( ) to complete the user authentication and authorization.

(Multiple choice)

- \* eSight Server

- \* client
- \* authenticator
- \* authentication server

#### NEW QUESTION 84

Huawei AP can also implement AP-based load balancing in Fat AP mode.

- \* True
- \* False

#### NEW QUESTION 85

Which of the following materials does the WLAN signal pass have less penetration loss? (Multiple choice)

- \* Gypsum board
- \* Glass window (colorless)
- \* Concrete wall
- \* Brick wall

#### NEW QUESTION 86

What are the reasons why users may not be able to connect to the WLAN properly? (Multiple choice)

- \* AP is blacklisted
- \* Weak wireless signal
- \* AP has too many connected users
- \* There are many sources of signal interference around

#### NEW QUESTION 87

Which of the following WLAN signals pass through (Select 2 Answers).

- \* Gypsum board
- \* Glass window (colorless)
- \* Concrete wall
- \* Brick wall

#### NEW QUESTION 88

In the WDS peer-to-peer network, the backbone link between the Root AP and the Leaf AP is connected in the 5 GHz band. The bandwidth used by the Root AP is 149.

Which of the following bands should the Leaf AP use?

- \* 149
- \* 153
- \* 157
- \* Except for 149

#### NEW QUESTION 89

When the AC is a side-by-side networking, if the data is directly forwarded, the data stream () AC; if the data is in tunnel forwarding mode, the data Stream AC.

- \* No pass, pass

- \* No pass, no pass
- \* After passing through
- \* After passing through not

#### NEW QUESTION 90

The following description of the service VLAN is correct (Select 3 Answers).

- \* Mainly responsible for transmitting data when WLAN users access the Internet.
- \* PVID VLAN under WLAN ESS interface
- \* Service VLAN under the service set template
- \* If data tunneling is used, user data will not be transmitted through the service VLAN.

#### NEW QUESTION 91

When configuring a WLAN network, which template should the domain management template be bound to?

- \* radio-profile
- \* traffic-profile
- \* security-profile
- \* vap-profile

#### NEW QUESTION 92

The equipment manufacturer can usually be judged according to the following.

- \* SSID
- \* MAC address
- \* Encryption type
- \* Channel

#### NEW QUESTION 93

The AP can provide power and data transmission through the POE switch.

- \* True
- \* False

#### NEW QUESTION 94

After the wireless user connects to the wireless signal point, the IP address cannot be obtained. What are the possible reasons?  
(Multiple Choice)

- \* DHCP server is not configured in the VLAN where the user is located.
- \* The wrong service vlan is configured.
- \* User specified authentication password is incorrect
- \* MAC address of the user device has been blacklisted.

#### NEW QUESTION 95

What is the China WLAN security mandatory standard?

- \* WiFi
- \* WAPI
- \* WLAN
- \* WiMax

### NEW QUESTION 96

The AP and the antenna can be connected.

- \* Network cable
- \* CATV coaxial cable
- \* Power cable
- \* 50 ohm RF coaxial cable

### NEW QUESTION 97

802.11n is faster than 802.11g, what are the main reasons? (Multiple choice)

- \* More spatial streams
- \* Wider channel
- \* More channels
- \* Shorter GI
- \* Higher coding ratio
- \* More subcarriers

### NEW QUESTION 98

Regarding the two major standards of PoE, the following statement is incorrect (Select 2 Answers). The

- \* 802.af standard was established in 2009, and the maximum output power is 30W.
- \* 802.at supports four power levels and only supports Category 5 lines.
- \* 802.af, also known as PoE+, is compatible with 802.at devices.
- \* 802.at, also known as PoE+, is compatible with 802.af devices.

### NEW QUESTION 99

Wireless client passive scanning is obtained by receiving what frames to get around the wireless network information?

- \* Beacon frame
- \* Probe Request frame
- \* Authentication frame
- \* Association Request frame
