# Get The Important Preparation Guide With 1Z0-1033-21 Dumps [Q26-Q44

Get The Important Preparation Guide With 1Z0-1033-21 Dumps Get Totally Free Updates on 1Z0-1033-21 Dumps PDF Questions NO.26 Your customer has sales organizations in two countries. The customer wants to make sure that users from one country have access only to quotes from that country.

How do you achieve this?
* Define different steps (for example, Pending A and Pending B) for each country. The participant profile of each step allows access through user groups (either Group A or Group B depending on the step).

Using transition rules, make sure that quotes for Country A are always moved to steps belonging to that country.
* Hide Transaction Manager in CPQ and make sure that all access to quotes is performed from the CRM system where you can easily define which quotes should be visible for different users.
* Define two groups: Country A and Country B. Define a participant profile, Sales, for each step. Define an auto-forwarding rule which returns either “Group A~company~Sales” or “Group B~company~Sales.”
* Define two groups: Country A and Country B. For each step, define two different participant profiles:Profile A and Profile B. For each profile, select one matching group.

NO.27 A CommerceConstraint rule has been used to show only the applicable currencies in the Currency attribute based on the value selected in the Country attribute.

After selecting the value in the Country attribute, what should be performed to run the specified Constraint rule?
* Any action will trigger the Constraint rule.
* The Save action must be performed.
* No additional action is needed.

* The Submit action must be performed.

NO.28 A customer has BOM Mapping configured on their site using a simple Table-Based BOM Mapping rule.

However, they want to modify their BOM Mapping to also map an additional Configuration attribute to a Transaction Line level attribute.

Which two methods can the customer use to achieve this? (Choose two.)
* Add a new entry in the BOM Attribute Mapping table for the BOM item.
* Add a new entry in the BOM Item Mapping Definition table for the BOM item.
* Add a new entry in the BOM Attribute Definition table for the BOM item.
* Define an Advanced BML-Based BOM Mapping rule that populates the”attributes” node of the BOM item.
* Define an Advanced BML-Based BOM Mapping rule that populates the “definition” node of the BOM item.
* Define an Advanced BML-Based BOM Mapping rule that populates the “fields” node of the BOM item.

NO.29 Along with Part Number, Quantity, and Price, you also want to send additional recommended item details from Configuration to Commerce by using a Recommended Item rule.

Which two options enable you to achieve this? (Choose two.)
* Use the Comment field to pass additional details.
* Pass the additional details by storing them in a Price Book.
* This is not feasible. Only Part Number, Quantity, and Price can bepassed from Config to Commerce by using Recommended Item rules.
* Concatenate the additional details to Part Number.
* Use BOM Mapping rules.

NO.30 What are three valid reasons for a Configuration rule failing to execute? (Choose three.)
* A runtime erroroccurs within the rule, which is firing before the current rule.
* The status of the rule is set to Inactive.
* The rule’s Condition attributes are hidden in Configuration Layout.
* The attributes used in the rule are not added in Configuration Layout.

NO.31 For a multi-language Document Designer template, which of the following two activities are possible for the nondefault language view? (Choose two.)
* Add new image element in a section.
* Add or remove table element’s rows and columns.
* Change text content.
* Move text elements between elements and layouts.
* Modify date and currency formats.

NO.32 In which two locations are thekeywords for mobile processing of quotes defined when setting up approvals?

(Choose two.)
* Submit sub-action – Submit for Approval
* Submit sub-action – Approve
* Submit sub-action – Reject
* Mobile Approval Email Notification

NO.33 Identify two options to which transactions can be forwarded using forwarding rules. (Choose two.)
* any of the users who arepart of the Approval group

* user groups
* users
* any email address registered in the CPQ Cloud system
Explanation

References:

NO.34 The commerce step “Pending” has four participant profiles in the following order: SalesRep,SalesManager, Owner, and Admin. The Admin profile allows access with the FullAccess user type. The Owner profile has at performer steps “start” step selected. The step has an auto-forwarding rule.

A FullAccess user with the SalesGroupA and SalesManagerA groups creates a new quote and saves it, which moves the quote to “Pending.” The auto-forwarding rule returned the following two lines:

SalesManagerA~Company~SalesManager

SalesGroupA~Company~SalesRep

Which profile will be used to display the quote in the”Pending” step to this user?
* SalesManager profile
* Owner profile
* Admin profile
* SalesRep profile

NO.35 What is the correct method to add new parts data to the CPQ Cloud database?
* Use the “Import from Source” function in the Migration Center to connect to the remote part system and upload the part data into a .csv file, put the .csv file in a compressed ZIP file, and use Bulk Upload to upload the part data to the CPQ Cloud site.
* Use Bulk Upload to upload the datafrom the remote part system into a .csv file and import the file into the CPQ Cloud site.
* Export the part data from your current part system into a .csv file, put the .csv file into a compressed zip file, and use Bulk Upload to upload the part data to the CPQ Cloud site.
* Perform a bulk-downloaded of at least one part to capture the part file format that the CPQ Cloud site uses, populate the new part data into the downloaded part file (.csv file), enter “add” in the Update column for each new part, save the spreadsheet as a .csv file, put the .csv file in a compressed zip file, and use Bulk Upload to upload the part data to the CPQ Cloud site.
* Use the “Import from Source” function in the Migration Center to connect to the remote part system and upload the part data directly to the CPQ Cloud database.

NO.36 Your customer wants to create a user that has complete access to the site and has the ability to add and edit new users.

Which procedure should you follow to accomplish this?
* Click the Add button on the User Administration List page; enter values for the required fields (Login, Password, Email, First Name, Last Name, and Phone Number); set the Type field to Admin; click the Add button to add the user to the system; click the new user’s name on the User Administration List page to edit the user; select the Add New Users check box; and click the Add button to save the changes.
* Click the Add button on the User Administration List page; enter values for the required fields (Login, Email, and First Name); click the Add button to add the user to the system; click the new user’s name on the User Administration List page to edit the user; select the Create/Modify Users check box; and click the Update button to save the changes.
* Click the Add button on the User Administration List page; enter values for the required fields (Login, Email, and First Name); set the Type field to FullAccess; select the Create/Modify Users check box, and click the Add button to add the user to the system.

* Click the Add button on the User Administration List page, set the Type field to Admin, click the Add button to add the user to the system, click the new user’s name on the User Administration List page to edit the user, select the Create/Modify Users check box, and click the Update button to save the changes.
* Click the Add button on the User Administration List page; enter values for the required fields (Login, Email, and First Name); set the Type field to FullAccess; click the Add button to add the user to the system; click the new user’s name on the User Administration List page to edit the user, select the Create/Modify Users check box; and click the Update button to save the changes.

NO.37 You have implemented a Commerce Constraint rule, which has an Advanced action. While testing, you find that the attribute values specified in the rule are not being constrained, even though the condition is always true.

What are two reasons for this behavior? (Choose two.)
* The attribute is used as a condition for a Commerce Hiding rule.
* Configuration was not deployed after the rule was implemented.
* Commerce was not deployed after the rule was implemented.
* The rule is inactive

NO.38 Identify two reasons why some or all transaction in a particular step are hidden for a user in Transaction Manager.
* The step has an auto-forwarding rule, which did not return the user or one of his groups and all participantprofiles do not have other permission methods selected.
* All participant profiles of this step have group access defined and the “Performer Step” set, and the user did not perform an action on the hidden transactions in other steps.
* There is no validparticipant profile for this user with hidden transactions.
* The user has the RestrictedAccess user type.
* A hiding rule was defined in commerce rules.
* The participant profile that is valid for this user has the Document Views tab, the Document Views panel, and the “Entire Document” = “hide” setting.

NO.39 Which Configuration Flow would you choose to design a Configurator where attributes vary based on prior user selections and have a sequential relationship consisting of distinct steps?
* Master Start and End Flow
* Multi Node Configuration Flow
* Search Flow
* any Configuration Flow with a combination of Constraint and Hiding rules that meet requirements

NO.40 Given the following code:

```
xmlPayload = "<?xml version= "1.0" encoding="UTF-8"?><library><book lang= "en">Spring in
Action</book><book lang= "fr">J2EE Blueprint</book></library>";
xpaths = string [1];
xpaths [0] = "/library/book/@lang";
output = rwadxmlmultiple (xmlPayload, xpaths);

for xpath in xpaths {
        print (" (key) = ( "+ xpath +")");
        values = string [1];
        values = get (output, xpath);

        for value in values{
                print (" (value) = (" + value + ") ");
        }
}
return " ";
```

What will be returned?

* (key) = (/library/book/@lang)(value) = (en)(value) = (fr)
* (key) = (/lang/book/library)(value) = (en)(value) = (fr)
* (key) = (/library/book/@lang)(value) =(English)(value) = (French)
* (key) = (/library/book/@lang)(value) = (Spring in Action)(value) = (J2EE Blueprint)

NO.41 What is the correct procedurefor moving a file from one folder to another in File Manager?
* Click File Manager on the Admin home page, click the source file folder, select the check box next to the file you want to move, click the destination folder, and click the Move button.
* Click File Manager on the Admin home page, click the source file folder, select the check box next to the file you want to move, select the destination folder from the Select Folder drop-down menu, and click the Move button.
* Click File Manager on the Admin home page, click the source file folder, click the file you want to move, and drag the file to the destination folder.
* Click File Manager on the Admin home page, click the source file folder, right-click the file you want to move and select Copy fromthe shortcut menu, click the destination file folder, and right-click in the list of files in that destination folder and select Paste from the shortcut menu.
* Click File Manager on the Admin home page, click the source file folder, select the check boxnext to the file you want to move, select the destination folder from the Select Folder drop-down menu, and click the Copy button.

NO.42 Which three page types have predefined page templates? (Choose three.)
* Process Document List Page
* Product Line List Page
* User Administration List Page
* Model List Page
* Parts Search Page

NO.43 Identify three types of activities that are captured in Administration logs. (Choose three.)
* migrations with the site as target
* deployment of configuration productfamilies
* creation of data tables
* modification of Commerce process objects
* creation of configuration objects
* uploading of files in File Manager

NO.44 An administrator tries to change the document views on an attribute from a participant profile on a given step.

But the attribute is not listed in the list of attributes that are available for editing.

What are two reasons for this behavior? (Choosetwo.)
* The attribute is being referenced in an active Hiding rule.
* The attribute is not added to the layout.
* The attribute is hidden on the Attribute Details page.
* The attribute is a system attribute.
