# [Q12-Q28 The Best Valid C_TS422_1909 Dumps for Helping Passing C_TS422_1909 Exam!

The Best Valid C_TS422_1909 Dumps for Helping Passing C_TS422_1909 Exam!
UPDATED SAP C_TS422_1909 Exam Questions & Answer

SAP C_TS422_1909 Certification Exam Topics:

Topic AreasTopic Details, Courses, Books**Production Orders in SAP S/4HANA > 12%**Determine BOM item category, describe order status management and set user statuses, configure availability check for components, trigger routing selection, set up an order type, apply material staging and confirmation. TS421 (SAP S/4HANA 1909)   TS422 (SAP S/4HANA 1909) **Lean Manufacturing in SAP S/4HANA 8% - 12%**Identify repetitive manufacturing specific master data, explain line load planning and confirmation, outline Kanban master data and Kanban processes. TS421 (SAP S/4HANA 1909)   TS422 (SAP S/4HANA 1909) **Master Data in SAP S/4HANA > 12%**Identify and explain production relevant master data, including, but not limited to: bill of material, routing and production version. TS421 (SAP S/4HANA 1909)   TS422 (SAP S/4HANA 1909) **Introduction to SAP S/4HANA Production Planning < 8%**Outline production planning components and functions, differentiate consumption-based planning vs. MRP, outline new trends in production planning. TS421 (SAP S/4HANA 1909)   TS422 (SAP S/4HANA 1909) **Advanced Planning in SAP S/4HANA > 12%**Outline the basics and master data of advanced planning, explain tools (alert monitor, detailed scheduling planning board) and advanced planning and detailed scheduling processes, explain planning evaluation concepts   TS421 (SAP S/4HANA 1909)   TS422 (SAP S/4HANA 1909) **Process Orders in SAP S/4HANA < 8%**Characterize process order elements and process order processing, determine master data objects for process orders, identify features for Good

Manufacturing Practices (GMP).   TS421 (SAP S/4HANA 1909)   TS422 (SAP S/4HANA 1909)   **Introduction to SAP S/4HANA Supply Chain Planning < 8%**Outline both motivation and background of SAP S/4HANA, describe its main components, the lines of business, and the SAP User Experience strategy.   TS421 (SAP S/4HANA 1909)   TS422 (SAP S/4HANA 1909)   **Demand Management in SAP S/4HANA < 8%**Explain and compare the different production methods in make-to-order, make-to-stock, and assembly planning.   TS421 (SAP S/4HANA 1909)   TS422 (SAP S/4HANA 1909)   **Capacity Planning in SAP S/4HANA 8% - 12%**Outline best practices for using SAP S/4HANA, describe the SAP HANA database concept and new user experience with SAP Fiori, outline the capabilities of embedded analytics.   TS421 (SAP S/4HANA 1909)   TS422 (SAP S/4HANA 1909)

Q12. How can you avoid order proposals for planned independent requirements with dates in the past?

There are 2 correct answers to this question.

Response:
* Use a planning strategy with requirements consumption
* Maintain adjustment parameter in the MRP group
* Reorganize planned independent requirements
* Set the requirements reduction indicator in the requirements class

Q13. You are working with planning strategy 40 (Planning-with-final assembly). When does consumption of planned independent requirements take place?
* When you create a sales order
* When you deliver a sales order
* When the MRP results are saved
* When you create a planned order

Q14. Which automotive-specific functionality is embedded in SAP S/4HANA?

There are 3 correct answers to this question.

Response:
* Equipment and Tools Management
* Enhanced characteristics based processes
* Packaging Logistics
* Parts interchangeability
* Enhanced Kanban Processing

Q15. How can you set up the supply source for the SAP Kanban process? Note: There are 3 correct answers to this question.
* Using purchase orders for external procurement
* Using stock transfer reservations for stock transfer
* Using run schedule quantities for in-house production
* Using purchasing costs for automated source prioritization
* Using quotations for internal and external procurement

Q16. Which options are available for an SAP S/4HANA deployment?

There are 2 correct answers to this question.

Response:
* SAP S/4HANA on premise
* SAP S/4HANA Professional services cloud
* SAP S/4HANA private cloud
* SAP S/4AHANA Enterprise Management cloud

Q17. What data can you maintain in the sub items of a bill of material (BOM)? Note: There are 2 correct answers to this question.
* Quantity
* Scrap percentage
* Installation point
* Item type

Q18. What does the bill of material usage (BOM usage) control at the BOM item level?

Response:
* Default unit of measure
* Allowed material type
* Default values for the item status
* Maximum allowed low-level code

Q19. During planning you are facing an overload situation on a resource. Which activities do you consider to create a feasible production plan?

There are 3 correct answers to this question.

Response:
* Use a bucket-oriented capacity check
* Use DS heuristic “Schedule Sequence”
* Use rescheduling with an alternative mode
* Use multilevel MRP run for the products on the resource
* Use optimization with respect to set-up times

Q20. Which functional capabilities does the Detailed Scheduling Board have?

There are 2 correct answers to this question.

Response:
* Change sales order quantities
* Enter time-ticket confirmation for production orders
* Change planned order quantities
* Undo for drag & Drop planning activities

Q21. What is the purpose of collective orders?
* To post production costs on a cost collector instead of the production order
* To combine order management of co-products and by-products with the main product
* To post any component withdrawals single back flush with order confirmation
* To manage production orders for an entire finished product on multiple levels

Q22. A planner updated a production order status from partially confirmed “PCNF” to technically completed

“TECO” by mistake.

What impact would this have to other users for this specific production order?

Please choose the correct answer.

Response:
* The production operator cannot enter additional confirmations
* The warehouse clerk still carry out goods issue transactions
* The buyer can still see component reservations
* The production manager can still see the capacity requirements

Q23. What does a line hierarchy in repetitive manufacturing represent?
* A production line with a parallel sequence in the routing
* A production line with an alternative sequence in the routing
* A production line with prioritized alternative work centers
* A production line with more than one work center

Q24. In your plant, MRP is activated. Which options do you have to exclude a material from the MRP run? Note:

There are 2 correct answers to this question.
* Use a specific material status.
* Use a specific MRP controller.
* Use a specific material group
* Use a specific MRP type.

Q25. How can SAP S/4HANA support a GMP compliant production process? Note: There are 3 correct answers to this question.
* Documentation of quality data with Quality Management
* Predefined GMP compliant process order types to meet audit requirements
* Use of the GMP compliant flag in relevant master data applications
* Use of the digital signature function to check and run business processes
* Recipe approval (with Engineering Change Management)

Q26. You use planning strategy Finite Scheduling – with Reverse and want to allow scheduling in the past. How can you achieve this?
* Specify a positive planning horizon in the strategy profile.
* Specify a negative planning horizon in the strategy profile.
* Specify a negative offset time in the strategy profile.
* Specify a positive offset time in the strategy profile.

Q27. What are some of the SAP Fiori user types?

There are 3 correct answers to this question.

Response:
* Employee
* Business partner
* Expert
* Occasional
* Developer

Q28. In which of the following master data objects can you define the production order default storage location for a material component?

There are 2 correct answers to this question.

Response:
* Routing, in the component allocation
* BOM, in the item for the material
* Work center, in the production supply area
* Material master of the finished product

SAP C_TS422_1909 Exam Description:

The "SAP Certified Application Associate - SAP S/4HANA Production Planning and Manufacturing" certification exam validates that the candidate possesses the fundamental and core knowledge required of the SAP S/4HANA Manufacturing consultant profile. This certification proves that the candidate has an overall understanding and in?depth technical skills to participate as a member of a project team in a mentored role.
