

2022 Realistic Verified Free Palo Alto Networks PCCET Exam Questions [Q22-Q43]

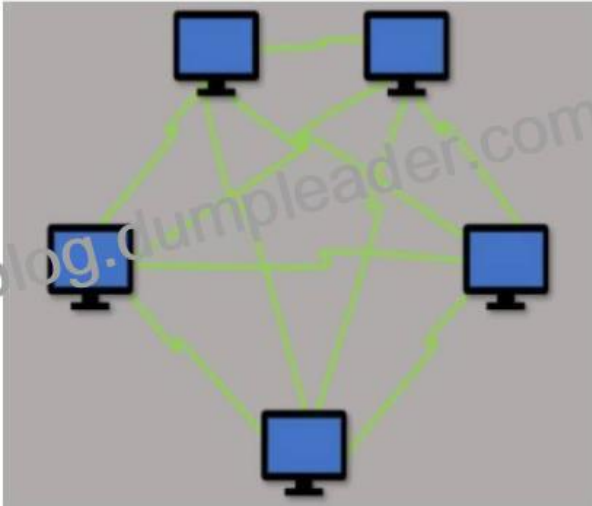

2022 Realistic Verified Free Palo Alto Networks PCCET Exam Questions
PCCET Real Exam Questions and Answers FREE

How to prepare for the Palo Alto Networks PCCET Certification Exam:

Practice a lot to reduce stress and improve your concentration level. Candidates must use the study techniques that they are comfortable with. You can also use sources like books, magazines, video tutorials, free & paid courses, notes prepared by experts, professional tutors, etc. for the preparation of the Palo Alto Networks PCCET Certification Exam. Preparation is the key to success in any exam. Candidates must understand all the syllabus before writing the exam. Candidates must ensure that they have a clear understanding of all the topics mentioned in the syllabus. Make sure that you are using the most updated version of the syllabus. Make sure that you understand all the topics before writing the exam. Candidates must make sure that they know how to approach every question that they face during the exam. **PCCET Dumps** helps candidates with this.

NO.22 Which type of LAN technology is being displayed in the diagram?

- * Star Topology
- * Spine Leaf Topology
- * Mesh Topology
- * Bus Topology

NO.23 Which product from Palo Alto Networks extends the Security Operating Platform with the global threat intelligence and attack context needed to accelerate analysis, forensics, and hunting workflows?

- * Global Protect
- * WildFire
- * AutoFocus
- * STIX

NO.24 What is the key to “taking down” a botnet?

- * prevent bots from communicating with the C2
- * install openvas software on endpoints
- * use LDAP as a directory service
- * block Docker engine software on endpoints

NO.25 What are two key characteristics of a Type 1 hypervisor? (Choose two.)

- * is hardened against cyber attacks
- * runs without any vulnerability issues
- * runs within an operating system
- * allows multiple, virtual (or guest) operating systems to run concurrently on a single physical host computer

NO.26 What does Palo Alto Networks Cortex XDR do first when an endpoint is asked to run an executable?

- * run a static analysis
- * check its execution policy
- * send the executable to WildFire
- * run a dynamic analysis

NO.27 Which activities do local organization security policies cover for a SaaS application?

- * how the data is backed up in one or more locations
- * how the application can be used
- * how the application processes the data

- * how the application can transit the Internet

NO.28 Which core component is used to implement a Zero Trust architecture?

- * VPN Concentrator
- * Content Identification
- * Segmentation Platform
- * Web Application Zone

NO.29 The customer is responsible only for which type of security when using a SaaS application?

- * physical
- * platform
- * data
- * infrastructure

NO.30 An Administrator wants to maximize the use of a network address. The network is 192.168.6.0/24 and there are three subnets that need to be created that can not overlap. Which subnet would you use for the network with 120 hosts?

Requirements for the three subnets: Subnet 1: 3 host addresses

Subnet 2: 25 host addresses

Subnet 3: 120 host addresses

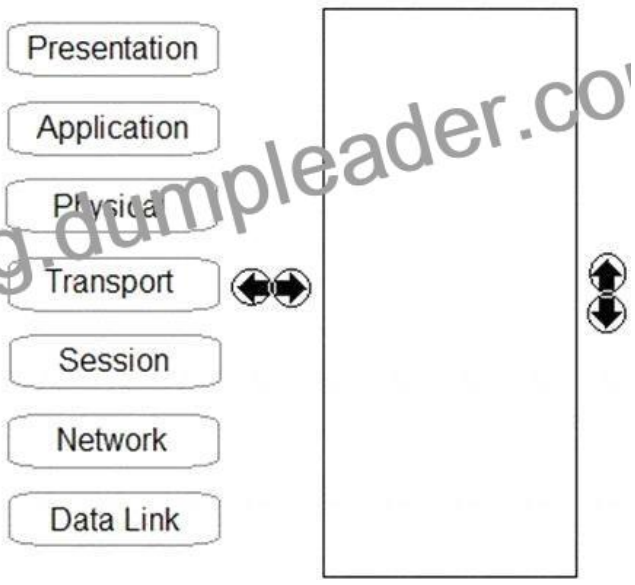

- * 192.168.6.168/30
- * 192.168.6.0/25
- * 192.168.6.160/29
- * 192.168.6.128/27

NO.31 Which Palo Alto subscription service identifies unknown malware, zero-day exploits, and advanced persistent threats (APTs) through static and dynamic analysis in a scalable, virtual environment?

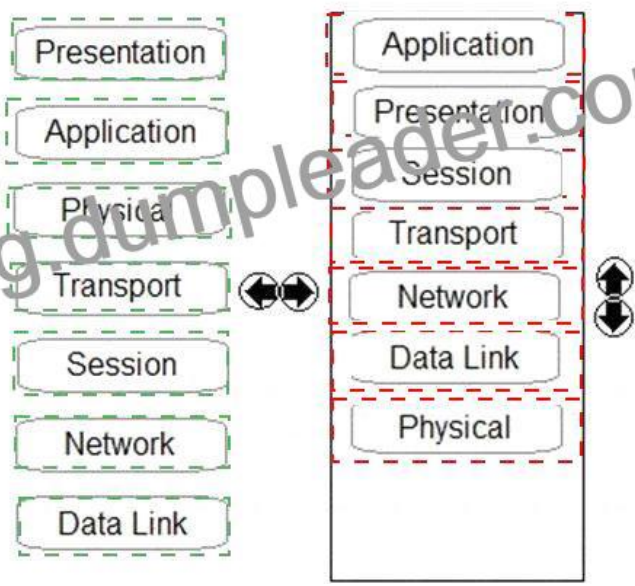

- * DNS Security
- * URL Filtering
- * WildFire
- * Threat Prevention

NO.32 Order the OSI model with Layer7 at the top and Layer1 at the bottom.

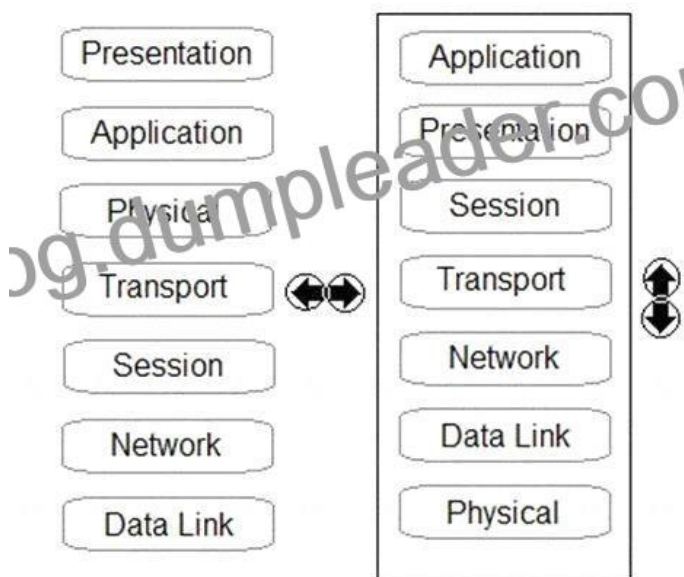

Unordered Options Ordered Options

Unordered Options Ordered Options

Unordered Options Ordered Options

NO.33 In addition to integrating the network and endpoint components, what other component does Cortex integrate to speed up IoC investigations?

- * Computer
- * Switch
- * Infrastructure
- * Cloud

NO.34 How does DevSecOps improve the Continuous Integration/Continuous Deployment (CI/CD) pipeline?

- * DevSecOps improves pipeline security by assigning the security team as the lead team for continuous deployment
- * DevSecOps ensures the pipeline has horizontal intersections for application code deployment
- * DevSecOps unites the Security team with the Development and Operations teams to integrate security into the CI/CD pipeline
- * DevSecOps does security checking after the application code has been processed through the CI/CD pipeline

NO.35 Anthem server breaches disclosed Personally Identifiable Information (PII) from a number of its servers. The infiltration by hackers was attributed to which type of vulnerability?

- * an intranet-accessed contractor's system that was compromised
- * exploitation of an unpatched security vulnerability
- * access by using a third-party vendor's password
- * a phishing scheme that captured a database administrator's password

NO.36 Which tool supercharges security operations center (SOC) efficiency with the world's most comprehensive operating platform for enterprise security?

- * Prisma SAAS
- * WildFire
- * Cortex XDR
- * Cortex XSOAR

NO.37 Which option would be an example of PII that you need to prevent from leaving your enterprise network?

- * Credit card number

- * Trade secret
- * National security information
- * A symmetric encryption key

NO.38 Which type of Wi-Fi attack depends on the victim initiating the connection?

- * Evil twin
- * JAsager
- * Parager
- * Mirai

NO.39 How does Prisma SaaS provide protection for Sanctioned SaaS applications?

- * Prisma SaaS connects to an organizations internal print and file sharing services to provide protection and sharing visibility
- * Prisma SaaS does not provide protection for Sanctioned SaaS applications because they are secure
- * Prisma access uses Uniform Resource Locator (URL) Web categorization to provide protection and sharing visibility
- * Prisma SaaS connects directly to sanctioned external service providers SaaS application service to provide protection and sharing visibility

NO.40 Which analysis detonates previously unknown submissions in a custom-built, evasion-resistant virtual environment to determine real-world effects and behavior?

- * Dynamic
- * Pre-exploit protection
- * Bare-metal
- * Static

NO.41 What is required for a SIEM to operate correctly to ensure a translated flow from the system of interest to the SIEM data lake?

- * connectors and interfaces
- * infrastructure and containers
- * containers and developers
- * data center and UPS

NO.42 SecOps consists of interfaces, visibility, technology, and which other three elements? (Choose three.)

- * People
- * Accessibility
- * Processes
- * Understanding
- * Business

Explanation

NO.43 Which organizational function is responsible for security automation and eventual vetting of the solution to help ensure consistency through machine-driven responses to security issues?

- * NetOps
- * SecOps
- * SecDevOps
- * DevOps
