

## [Nov-2022 156-560 Questions - Truly Beneficial For Your CheckPoint Exam [Q11-Q25]

### [Nov-2022 156-560 Questions - Truly Beneficial For Your CheckPoint Exam Download CheckPoint 156-560 Sample Questions NO.11 What is Cloud Security according to the Five Pillars?

- \* The ability to support development and run workloads effectively
- \* The ability of a Workload to function correctly and consistently in all expected
- \* The ability to use cloud resources efficiently for meeting system requirements, and maintaining that efficiency as demands changes and technologies evolve
- \* In terms of tie cloud, security is about architecting every workload to prevent

### NO.12 The integration of cloud resources into the Security Policy requires establishing a secure connection between\_\_\_\_\_

- \* The SDDC, CloudGuard Security Gateways, and the Security Management Server
- \* The SDDC and CloudGuard Security Gateways.
- \* The SDDC and the Security Management Server
- \* CloudGuard Security Gateways and the Security Management Server

### NO.13 Deployment of a Security Gateway was initiated on AWS using a CloudFormation Template available through sk111013. The deployment process, after a while failed and rolled back. What could be the probable cause of this failure and roll back?

- \* The Security Management Server that will be managing the Security Gateway had a lower version
- \* The specific software being deployed was not subscribed to in the AWS Marketplace Subscriptions
- \* The template used was for some cloud platform other than AWS
- \* The web browser used to run the template was not compatible

**NO.14** Logging Implied rules, enabling Hit Count and defining advanced VPN functions are all settings that are applied as

- \* Inline Layer
- \* Global Properties
- \* Policy Settings
- \* Gateway Properties

**NO.15** Adding new Security Gateways as system load increases is an example of \_\_\_\_\_

- \* Vertical Scaling
- \* Network Scaling
- \* Horizontal Scaling
- \* System Scaling

**NO.16** Which is not a deployment method for CloudGuard solutions using

- \* Terraform
- \* Shell
- \* CLI
- \* CPS Portal

**NO.17** What platform provides continuous compliance and governance assessments that evaluate public infrastructure according to industry to industry standards and best practices?

- \* Cloud Security Posture Management
- \* CloudGuard IaaS Public Cloud
- \* CloudGuard SaaS
- \* CloudGuard IaaS Private Cloud

**NO.18** REST is an acronym for the following

- \* Representation of Security Traffic
- \* Really Efficient Security Template
- \* Representational State Transfer
- \* Real Security Threat

Explanation

The abbreviation REST stands for **Representation of Security Traffic**; **Really Efficient Security Template**; and refers to a software architectural style. It is based on six principles that describe how networked resources are defined and addressed on the web, for example in a cloud.

**NO.19** Which software blade provides forensic analysis tools?

- \* Logging Blade
- \* Identity Awareness Blade
- \* Monitoring Blade
- \* SmartEvent Blade

**NO.20** CloudGuard uses several management tools to create and manage Security Policies. Which is NOT one of those tools?

- \* Gaia Portal
- \* CloudGuard Controller
- \* SmartConsole
- \* CLI

**NO.21** A utility that allows integration between SMS, the CloudGuard Network Solution, and CSPs, allowing the SMS to monitor and control scaling solutions in their associated cloud environments is called

- \* CloudGuard Management Extension (CME)
- \* CloudGuard Controller and Enforcer (CCE)
- \* CloudGuard Scanner and Enforcer (CSE)
- \* CloudGuard Controller (CC)

**NO.22** According to best practices what would be the best way to install a Check Point cluster on AWS?

- \* Following the instruction from the relevant Check Point SK
- \* With PowerShell
- \* From AWS Console
- \* From AWS Market Place

**NO.23** Why is an IAM role created when installing a cluster on AWS?

- \* In order to perform cluster related changes
- \* It is created for the installation process only, it gets deleted
- \* IAM role is created for auditing purposes
- \* IAM role is not created

**NO.24** Which pricing model gives administrators the ability to deploy devices as needed without the need to purchase blocks of vCore licenses?

- \* Pay As You Go
- \* Bring Your Own License
- \* Central licensing
- \* Local licensing

**NO.25** What is Reliability according to the Five Pillars?

- \* The ability to use cloud resources efficiently for meeting system requirements, and maintaining that efficiency as demand changes and technologies evolve
- \* The ability of a Workload to function correctly and consistently in all expected.
- \* The ability to support development and run workload effectively
- \* In terms of the cloud, security is about architecting every workload to prevent.

Explanation

The Reliability pillar encompasses the ability of a workload to perform its intended function correctly and consistently when it's expected to. This includes the ability to operate and test the workload through its total lifecycle. You can find prescriptive guidance on implementation in the Reliability Pillar whitepaper.
