SAP S/4HANA Project Systems Certification Exam Details:

Number of Questions 80 Exam Code C_TS412_1909 Schedule Exam SAP Training Exam Name SAP Certified Application Associate - SAP S/4HANA Project Systems Level Associate Sample Questions SAP S/4HANA Project Systems Certification Sample Questions Exam Price \$560 (USD)

SAP S/4HANA Project Systems Certification Exam Topics:

Topic Areas Topic Details, Courses, Books Weighting Project Structures Name the components of Work Breakdown Structure, Network and activities, Milestones S4121 (SAP S/4HANA 1909)

S4122 (SAP S/4HANA 1909) > 12% Reporting Determine general reporting requirements and reporting requirements for cost centers. Configure cost center reporting and create report painter reports S4120 (SAP S/4HANA 1909) < 8% Revenues and Payments Describe the characteristics of Revenues & Payments. S4123 (SAP S/4HANA 1909) > 12% Dates Describe the importance

of various dates which can be tracked for projects S4122 (SAP S/4HANA 1909)> 12%

Q52. You want to assign milestones to WBS elements. For what can you use these milestones? Note: There are 2 correct Answers to this question.

- * To start workflow tasks
- * For trend analysis
- * To transfer the actual date to the billing plan
- * To set an actual finish date for WBS elements

Q53. What are valid procurement types for stock items? Note: There are 3 correct Answers to this question.

- * Third-party order
- * Preliminary purchase requisition for WBS element
- * Purchase requisition and Reservation for WBS element
- * Planned order
- * Reservation for WBS element

Q54. What is the reason for assigning billing plans in customer projects?

- * Billing plans are copied automatically to the sales order item.
- * Billing plans are used for revenue planning.
- * Billing plans enable the billing process to be carried out.
- * Billing plans are prerequisites for quotation creation.

Q55. You are using budgeting and active availability control. How can availability control be activated? Note: There are 2 correct answers to this question

- * Automatic activation with budget assignment
- * Automatic activation with assignment to an investment program
- * Background activation (CJBV – Activate Availability Control) 1
- * Automatic activation with the first actual posting

Q56. Material

How can the system activate requirements (such as reservations or purchase requisitions)?

Note: There are 2 correct answers to this question

- * Immediately, by saving the project
- * Automatically, using the requirement date and the replenishment lead time
- * Using a standard milestone activity
- * When releasing a network or an activity

Q57. Which of the following business processes do NOT lead to the booking of actual costs to an object?

Note: There are 2 correct Answers to this question.

- * Recording of external services in the service entry sheet
- * Goods receipt into valuated project stock
- * Goods receipt into unvaluated project stock
- * Goods receipt of a non-stock item

Q58. A component is assigned to a network activity. What are the prerequisites to generate project stock reservations? Note: There are 3 correct Answers to this question.

- * A procurement indicator must be assigned to the activity.
- * The material master of the component must permit project stock management.
- * The network is assigned to a sales order item.
- * The network activity is assigned to a WBS element.
- * The Project Stock indicator is set in the project definition (non-valuated or valuated).

Q59. You want to create a reservation for a material component assigned to a network activity.

However, after releasing and saving the activity, no reservation is created. What are some possible reasons for the missing reservation?

Note: There are 2 correct answers to this question

- * The availability check for material components indicates missing parts
- * The material master is set to external procurement
- * The indicator Reservation/Purchase Requisition indicator for the material component assigned to the activity is set to never;
- * The material is assigned to the activity as a non-stock material

Q60. You want to use subnetworks during the project. Which of the following statements describes subnetworks?

- * Maintenance orders can be defined as sub-network
- * The scheduling type of a subnetwork is always copied from the superior network
- * A subnetwork cannot be defined for a superior subnetwork.
- * Subnetworks must be scheduled separately from the superior network

Q61. Materials

Your customer use a tight (estrecha) integration between sales order and WBS with network to deliver finished and semi-finish product.

What benefit do they have when using delivery from project (CNSO).

- * With delivery from projects You can generate goods issues for project without creating delivery documents.
- * With delivery from projects good receipt are automatically posted while saving.
- * With delivery from projects you can generate purchase requisitions for sub-contractors.
- * With the delivery from project you can deliver material component assigned to your network.

Q62. A customer needs to analyze the capacity requirements of their network activities. Which reports do you recommend? Note: There are 2 correct answers to this question

- * Resource reports
- * Cost element reports
- * Structure information system reports
- * Hierarchical reports

Q63. Resources

You Want assign milestone to WBS element? For what can you use these milestone.

- * To create standard network
- * To start workflow task.
- * For trend analysis.

- * To set an actual finish date for WBS element-

Q64. The system status of a WBS element is created (CRTD). Which business process is allowed for this NBS element

- * Calculation of actual values
- * Goods receipt for purchase order
- * Creation of purchase orders
- * Activity allocation

Q65. What are some of the advantages of using project simulations? Note: There are 3 correct Answers to this question.

- * Project simulations can be used to plan structures and costs.
- * Project simulations can create purchase requisitions.
- * Project simulations can be created without using an operational project as a template.
- * Project simulations allow posting of actual data.
- * Multiple project simulations can be used simultaneously.

Q66. You used reductions to reduce the scheduled duration of all internally-processed activities in your project. However,

the duration did not changed after overall network scheduling. What do you check? Note: There are 2 correct answers to this question

- * If the maximum reduction level is less than 100
- * If the reduction strategy is set in the network header
- * If the reduction strategy is set in each activity
- * If the appropriate reduction type is set in the parameters for network scheduling

Q67. You want to use subnetworks during the project. Which of the following statements describes subnetworks?

- * Maintenance orders can be defined as subnetworks.
- * The scheduling type of a subnetwork is always copied from the superior network.
- * A subnetwork cannot be defined for a superior subnetwork.
- * Subnetworks must be scheduled separately from the superior network.

Q68. In your logistics project, you want to carry out the internal project work as soon as possible. What do you have to maintain in capacity requirements planning?

- * Capacity planner group in the network header
- * Control key of an activity
- * Scheduling and distribution key
- * Scheduling and capacity category

Q69. You are using networks and external activities in your project. The purchase requisition has been created. What is the sequence for the following business transactions and documents?

- * Vendor selection -> Purchase order handling -> Invoice receipt -> Purchase order monitoring -> Goods receipt
- * Credit limit check -> Acceptance of performed services -> Vendor selection -> Purchase order handling

-> Purchase order monitoring -> Goods receipt -> Invoice receipt

- * Vendor selection -> Purchase order creation -> Service entry sheet creation -> Service entry sheet approval
- * Vendor selection -> Purchase order handling -> Purchase order monitoring -> Goods receipt

Q70. What PP/DS master data is necessary for using PP/DS? Note: There are 2 correct Answers to this question.

- * Resource
- * Material
- * Location

* Production version

Q71. What are some of the possible functions in user status profiles? Note: There are 2 correct Answers to this question.

- * Restrict setting user status for individual users.
- * Utilize priorities for setting the user status.
- * Allow business processes forbidden by SAP system status.
- * Ensure user status must always be set manually.

Q72. Project structure

You want use a template to create a new project with network in the Project Builder (CJ20N). Which template can you use in Project builder?

Note : there are 3 correct answer for this question.

- * Project milestone
- * Standard network
- * Standard Project definition
- * Project version.
- * Project definition

Q73. Project Structure

Your customer has implemented budgeting for projects. The current budget of their projects has been changed several times.

Therefore they want to get an overviews of the budget updates.

What standard report do you recommend?

- * Structure overviews for budget.
- * Cost element report on budget updates.
- * Line item report for budget
- * Hierarchical report on budget updates.

Q74. Dates

You have a project with a network, material and milestone. You want to plan an activity to start two days after its predecessor. How can you do that?

Note : there are 2 correct answers for this question.

- * Use an offset of two days for the relationship of both activities.
- * Use an offset of two days for milestone date.
- * Use an offset of two days for the requirement date of the material component
- * Calculate the start date of the activity and set the constraint $\&\#8220$;Must start on $\&\#8221$; accordingly.

Q75. Where can you assign the user status profile for WBS elements? Note: There are 3 correct Answers to this question.

- * In the operative WBS element
- * In the project profile
- * In the project version
- * In the project definition of a standard WBS
- * In the project type

Q76. How can you record external service activities with service master data? Note: There are 2 correct Answers to this question.

- * Confirm the network activity for external services.
- * Confirm the activities in the Cross-Application Time Sheet (CATS).
- * Post a goods receipt in the goods movement application (MIGO).
- * Create a service entry sheet.
