NEW QUESTION 44

A director would like to have an up to date Cluster Efficiency Summary report emailed on the first of every month to keep management up to date on how the cluster is being utilized.

How could a playbook be configured to satisfy this request with the least human interaction?

* Manual Trigger > Wait Until Day of Month > Generate Report > Email
* Manual Trigger > Generate Report > Email
* Report Trigger > Wait Until Day of Month > Email
* Time Trigger > Generate Report > Email

NEW QUESTION 45

A developer has a Development Blueprint that performs the following high level items:

Creates a Windows and Ubuntu Server.

Installs IIS on Windows

Installs MySQL on Ubuntu

As part of Development, there is a need for an Operator to restart IIS Services for troubleshooting purposes.

How should the developer add this functionality to the Blueprint?
* Add an Execute Task in the Restart Action of the Application Profile.
* Add an Execute Task in the Restart Action of the Windows/IIS Service.
* Add a Delay Task in the Restart Action of the Windows/IIS Service.
* Create an Endpoint for the IIS server and a Runbook that restarts the service.

NEW QUESTION 46

What is the correct method to upgrade Calm?
* Calm Marketplace
* LCM via Prism Element
* LCM via Prism Central
* Calm Dashboard

NEW QUESTION 47

Refer to the exhibit.

A Blueprint fails on executing a check-login task against a Windows 2016 VM and displays the error shown in the exhibit. The administrator is using a SSH key-based credential to authenticate the task.

What should the administrator change to resolve the issue?
* Increase the retries to allow for the task to complete.
* Change to password authentication credential.
* Ensure the private key for the credential is correct.
* Modify the timeout to give the task longer to complete.

NEW QUESTION 48

An administrator has been asked to review and clean up all existing categories within the Nutanix environment.

What information should the administrator filter on to organize the findings and eliminate unused categories?

* Policies, Triggers, Categories, and Entities
* Blueprint, Triggers, Categories, and Polices
* Blueprint, Policies, Value, and Entities
* Name, Value, Entities, and Policies

NEW QUESTION 49

Refer to the exhibit.

The VM appSAP01dev is a SAP development environment application and it is common to have memory constrained alerts on this VM, but the administrator wants to avoid adding memory to development VMs like this one, since this is normally done for only production VMs.

Which two actions should the administrator take to avoid adding memory to the development VMs? (Choose two.)
* Assign the category Environment:Production to the production VMs
* Modify the Alert by adding the correct category
* Disable the Alert in Prism Central
* Assign the category Environment:Development to development VMs

NEW QUESTION 50

Refer to exhibits.

The variable VM_NAME is giving a warning that indicates that the variable is not found. When checking the Service tab, the variable is found to match the VM_NAME field entry as shown in the exhibit below:

What is causing this warning message?

* VM_NAME variable must be defined under Application Profile
* Service Name matches the variable name
* @@{calm_time}@@ output is longer than allowed for a Service Name
* User modifiable variable for VM_NAME is not allowed

NEW QUESTION 51

An administrator manages two Nutanix clusters: Cluster01 and Cluster02 and has needs to automate similar workload types using these images that are located on Cluster01:
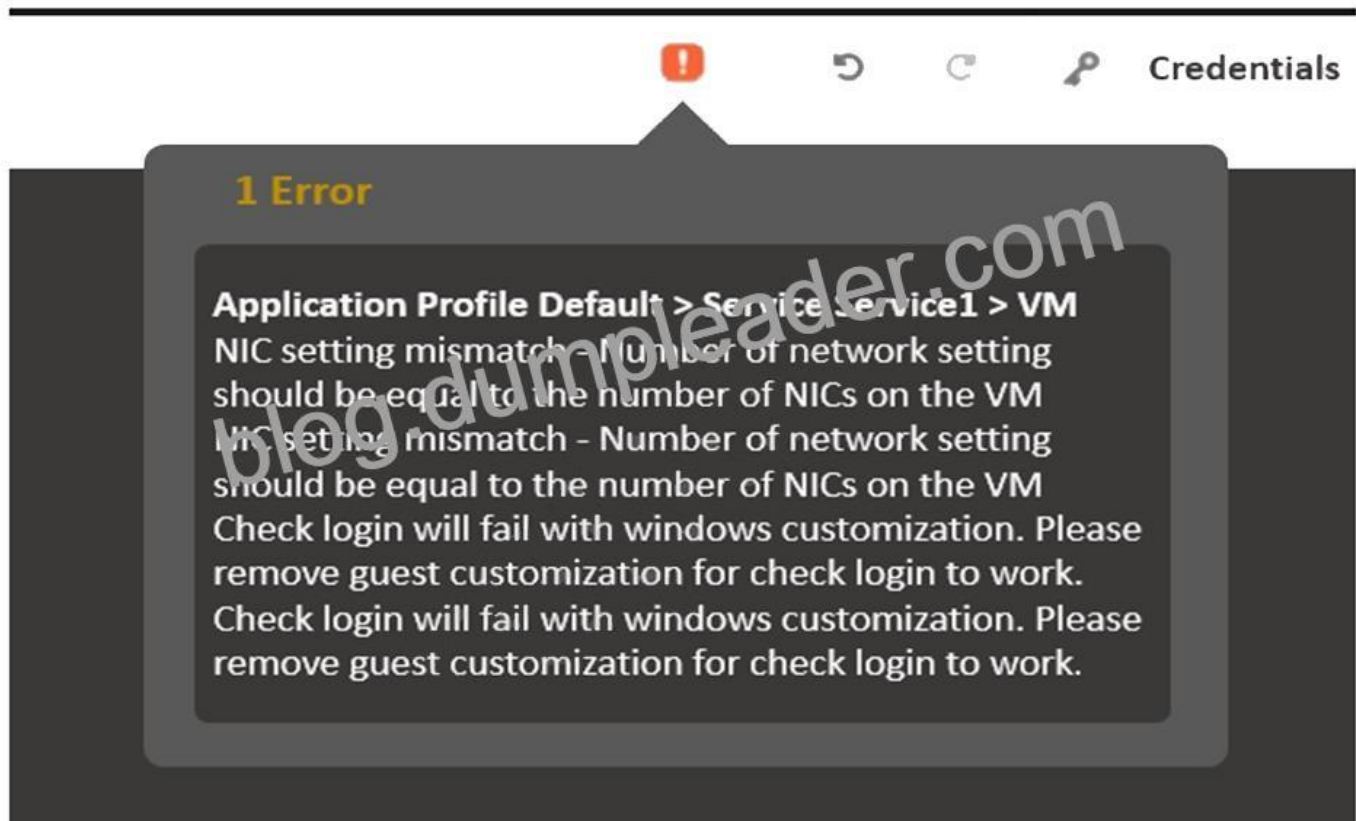

ImageA

ImageB

ImageC

The administrator needs to deploy ImageA and ImageC within the Cluster02 environment.

How this can be achieved?

* Configure a Protection Domain to replicate images.
* Clone the images from the Cluster01 to Cluster02.
* All images are available to all clusters managed by a single Prism Central.
* Utilize Prism Central image placement policies.

NEW QUESTION 52

Refer to the exhibit.

Saving the Calm Blueprint gives the validation error for VMware Blueprints shown in the exhibit.

What could be the cause of the error?
* Number of Template vCPU components should be equal to the number of pCPU configured.
* Number of Template NICs components should be equal to the number of Network Settings configured.
* Number of Template devices components should be equal to the number of Devices configured.
* Number of Template VMXNET3 components should be equal to the number of Virtual e1000 adapters configured.

NEW QUESTION 53

An administrator is trying to delete a category, but the option is greyed out.

Which two conditions could be causing this issue? (Choose two.)
* The category is system defined.
* The category is assigned to powered-on VMs.
* The category is part of a flow policy.
* The category is user defined.

NEW QUESTION 54

An administrator has created a task for a blueprint that could be applied to another blueprint. The administrator wants to reuse the task with the least amount of effort.
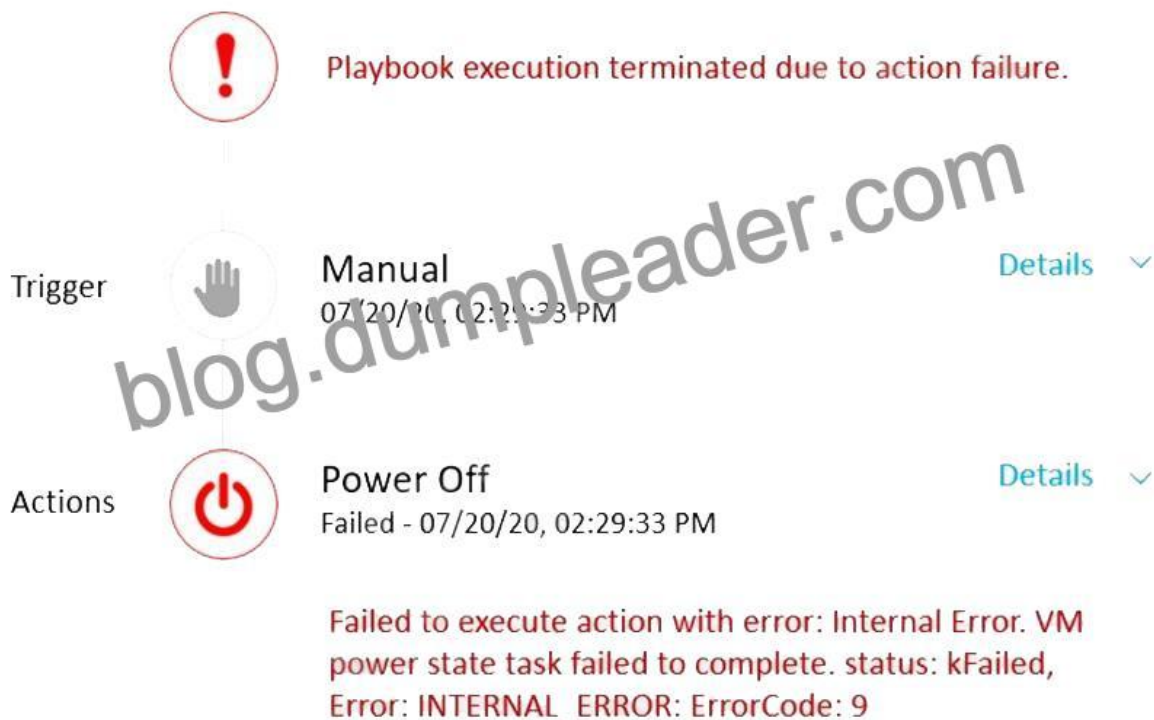

How can the administrator accomplish this?

* Publish the task to Github select the task from the Github Repository from the other blueprint.
* Publish the task to the Marketplace, select the task from the Marketplace from the other blueprint.
* Publish the task to the Task Repository, select the task from the Task Repository from the other blueprint.
* Publish the task to the Task Library select the task from the Task Library from the other blueprint.

NEW QUESTION 55

Refer to the exhibit.

A subset of Linux VMs are required to be gracefully shutdown each evening. A Playbook is created to shutdown the targeted VMs, however the error message shown in the exhibit is displayed when the Playbook is executed.

What is causing the error message?
* User executing the Playbook does not have Admin privileges.
* The VM is already powered off.
* The VM is missing Nutanix Guest Tools.
* The SSH Service is not running on the VMs.

NEW QUESTION 56

Where should an administrator check why a Playbook failed to grow the memory of a VM?
* VM Details in Prism Element

* Plays dashboard in Prism Central
* VM Details in Prism Central
* Plays dashboard in Prism Element

NEW QUESTION 57

A company’s NOC personnel have a custom Python script they run manually by logging into each VM to fix a common issue across all of the corporate VMs. Management has no audit history of who is running the script or when it is occurring. The company has recently implemented Calm and management has asked its administrators to accomplish these tasks:

Reduce the manual effort for the NOC personnel.

Ensure the process is repeatable across all applications.

Provide audit history for management of the actions.

Which two actions should the administrators take to accomplish these tasks? (Choose two.)
* Create a new Action, Add an Execute task with a script type of EScript, paste the custom script into the action
* View the Execution History tab under the Runbook page for audit purposes
* Create a new Runbook Add an Execute task with a script type of EScript paste the custom script into the action
* View the Audit tab under the Application view for audit purposes

NEW QUESTION 58

An administrator needs to enable Showback in Calm to allow departments to see costs associated with their Projects.

Where in Calm would the administrator enable Showback?
* Marketplace
* Projects
* Setting
* LCM

Upon passing the Nutanix NCP-MCA exam, candidates will receive the Nutanix Certified Professional - Multicloud Automation certification. Certified Professional - Multicloud Automation certification is recognized globally and is highly valued by employers in the IT industry. Certified Professional - Multicloud Automation certification indicates that the candidate has the skills and expertise required to manage and deploy applications in a multicloud environment, making them a valuable asset to any organization.
