The United States Medical Licensing Examination, commonly known as the USMLE, is a three-step exam designed to assess the medical knowledge and skills of individuals seeking to practice medicine in the United States. USMLE exam is administered by the National Board of Medical Examiners (NBME) and the Federation of State Medical Boards (FSMB). The USMLE is a crucial step in the process of obtaining a medical license in the United States.

USMLE is administered by the National Board of Medical Examiners (NBME) and the Federation of State Medical Boards (FSMB). USMLE exam consists of three steps, and each step assesses different aspects of a physician's knowledge and skills. Step 1 assesses basic medical knowledge, Step 2 assesses clinical skills and knowledge, and Step 3 assesses the ability to apply medical knowledge and skills in the context of patient care. Physicians must pass all three steps of the USMLE in order to obtain a medical license and practice medicine in the United States.

USMLE Step 2 is open to all medical students and graduates who have successfully passed the USMLE Step 1. The Step 2 exam assesses the candidates' medical knowledge, skills, and understanding of clinical science essential for patient treatment and care, health promotion and disease prevention.
