QUESTION 29

In SAP Central Business Configuration, what does the **Confirm Scope and Organizational Structure is Completed** milestone trigger in the Implementation Project?

- * Installation of the Production System
- * Installation of the Starter
- * System 3 Installation of the Quality System
- * Initial Transport from Quality to Production

QUESTION 30

How can you migrate data to SAP S/4HANA Cloud, public edition? Note: There are 2 correct answers to this question.

- * Staging database
- * RFC calls
- * File templates
- * Core Data Services

You can migrate data to SAP S/4HANA Cloud, public edition by using one of the following methods:

File templates

Core Data Services File templates are predefined Excel files that allow you to enter and upload data to staging tables in SAP S/4HANA Cloud using the SAP S/4HANA Migration Cockpit. Core Data Services are data models that allow you to access and manipulate data in SAP S/4HANA Cloud using SQL statements or ABAP code. Reference:

QUESTION 31

Which activities can you perform when you use general ledger accounting in SAP S/4 HANA Cloud? 2 answers

- * Display general ledger items, documents and good balances
- * Post to the financial statement version
- * Carry out recurring entries
- * Release blocked sales orders

QUESTION 32

Which of the following security measures is the customer responsible for?

- * Application-level user management
- * Change logging through audit trails
- * Deactivation of SAP administrative users
- * API management

QUESTION 33

Which characteristic must be unique for each cash journal?

- * Business transaction
- * G/L account
- * Tax code
- * Currency

QUESTION 34

For which of the following activities is the starter system used?

- * Transport the solution configuration to the quality system.
- * Set up the Test Automation Tool.
- * Run integration testing.
- * Document delta requirements in the backlog.

One of the activities that you use the starter system for is to document delta requirements in the backlog. The starter system is a temporary system that is used for scoping and configuration activities during the Explore phase. You can use the starter system to document any delta requirements that are identified during Fit-to-Standard workshops in a backlog using an app such as Manage Backlog Items. QUESTION 35

Where can you find content to set up an integration if there is no SAP Best Practices content available?

- * SAP BTP Cockpit
- * SAP Fiori Apps Reference Library
- * SAP API Business Hub
- * SAP Extensibility Explorer

You can find content to set up an integration if there is no SAP Best Practices content available in the SAP API Business Hub. The SAP API Business Hub is a catalog of APIs, events, and integration flows that allow you to discover and consume services from SAP and selected partners. You can use the SAP API Business Hub to explore, test, and implement integrations between SAP S/4HANA Cloud and other SAP Cloud solutions. Reference:

QUESTION 36

When setting up integrations with external systems, how many communication arrangements should you create?

- * One for each communication user you intend to use

- * One for each communication scenario you are implementing
- * One for each communication protocol you are using
- * One for each external system you want to interface with

When setting up integrations with external systems, you should create one communication arrangement for each communication scenario you are implementing. A communication arrangement is a configuration that defines how your system communicates with an external system using a specific communication scenario. A communication scenario is a predefined integration content that describes the inbound and outbound communication between your system and an external system using a specific communication protocol and interface.
