

## [Feb-2025 SAP C\_P2W\_ABN DUMPS WITH REAL EXAM QUESTIONS [Q48-Q70]

[Feb-2025] SAP C\_P2W\_ABN DUMPS WITH REAL EXAM QUESTIONS  
2025 New Dumpleader C\_P2W\_ABN PDF Recently Updated Questions

**NO.48** How is data shared between Web Dynpro controllers?

Note: There are 2 correct answers to this question.

- \* By using context mapping from a view controller to a custom controller
- \* By using data binding from a view controller to another view controller
- \* By using context mapping from a view controller to another view controller
- \* By using context mapping from a view controller to the component controller

**NO.49** Which of the following standard hook methods exist in all Web Dynpro controllers?

Note: There are 2 correct answers to this question.

- \* wddoexit
- \* wddoinit
- \* wddobeforenavigation

\* wddoafteraction

**NO.50** You have written a method implementation containing the following access to an internal table defined as a changing parameter of the method.

```
READ TABLE ct_itab INTO cs_struc INDEX 1.
```

What are the possible type definitions for parameter ct\_itab?

Note: There are 3 correct answers to this question.

- \* Any Table
- \* Sorted Table
- \* Standard Table
- \* Hashed Table
- \* Index Table

**NO.51** To which of the following can you assign a search help?

Note: There are 3 correct answers to this question.

- \* Structure component
- \* Table type
- \* Domain
- \* Check table
- \* Data element

**NO.52** What are the advantages of defining text symbols in executable programs?

Note: There are 2 correct answers to this question.

- \* They can store up to 256 characters.
- \* They facilitate multilingual functionality.
- \* They are easier to maintain than literals.
- \* The text of the text symbol can be changed at runtime.

**NO.53** You want to develop a program that processes character type data.

a. When you implement the program, you can either use the classical string statements or the newer string expressions and functions.

What are the main benefits of using the newer string expressions and string functions?

Note: There are 2 correct answers to this question.

- \* You can write code that is very easy to read and understand.
- \* You can improve the performance significantly.
- \* You can reduce the number of intermediate variables.
- \* You can write compact syntax instead of a long sequence of statements.

**NO.54** You write a report that displays mass data in a table using the ALV Grid Control.

Which of the following functions can you offer to the user without doing any specific programming? Note: There are 2 correct answers to this question.

- \* Sort and filter the data by any column

- \* Display details by double-clicking on a row
- \* Change column width and sequence
- \* Convert currency amount columns

**NO.55** Which of the following actions can you perform in both the ABAP Editor and in the ABAP Debugger?

- \* Create a breakpoint for a specific message.
- \* Create a breakpoint for a specific statement.
- \* Create a breakpoint for a specific line.
- \* Create a watchpoint for a specific variable.

**NO.56** Which enhancements can provide a screen exit? Note: There are 3 correct answers to this question.

- \* New BAdIs
- \* Classic BAdIs
- \* Customer exits
- \* Explicit enhancement points
- \* Explicit enhancement sections

**NO.57** How can you search for classic Business Add-Ins (BAdIs)?

Note: There are 2 correct answers to this question.

- \* Search in the application program for the GET BADI statement.
- \* Search in the application program for the method GET\_INSTANCE of class CL\_EXITHANDLER.
- \* Search in the application program for the CALL BADI statement.
- \* Search the relevant component in the Implementation Guide (IMG).

**NO.58** You write a program that updates a data record in the database using the following statement:

```
UPDATE scarr FROM Is_scarr.
```

Which of the following tasks does the database interface perform?

Note: There are 2 correct answers to this question.

- \* It translates the statement to native SQL.
- \* It applies a logical lock to the updated data record.
- \* It restricts the access to the logon client.
- \* It checks the authorization of the current user.

**NO.59** A screen has the following PAI flow logic:

```
PROCESS AFTER INPUT.
```

```
FIELD A MODULE check_A.
```

```
FIELD B MODULE check_B. CHAIN.
```

```
FIELD: C,D.
```

```
MODULE check_CD.
```

```
ENDCHAIN.
```

CHAIN.

FIELD: C,B.

MODULE check\_CB. ENDCHAIN.

What happens if the application sends a type E message during the check\_CB module processing?

- \* The screen is NOT displayed again. Processing terminates and the user must restart the ABAP program.
- \* The screen is displayed again and the PBO flow logic is processed. Only fields B and C are ready for input.
- \* The screen is displayed again without processing the PBO flow logic. Only fields B and C are ready for input.
- \* The screen is displayed again without processing the PBO flow logic. All fields are ready for input.

**NO.60** What ABAP Dictionary object allows you to define fixed values?

- \* Domain
- \* Data element
- \* View
- \* Lock object

**NO.61** What type of ABAP Dictionary view is implemented as an INNER JOIN?

- \* Database view
- \* Help view
- \* Projection view
- \* Maintenance view

**NO.62** You create a domain in the ABAP Dictionary.

How can you use this domain?

Note: There are 2 correct answers to this question.

- \* To define the data type of a table field or structure component
- \* To define data objects in ABAP programs
- \* To define technical properties of data elements
- \* To describe the value range of a table field or structure component

**NO.63** What must exist before you can create a new transportable function module?

Note: There are 3 correct answers to this question.

- \* Type group
- \* Change request
- \* Function group
- \* Package
- \* Module pool

**NO.64** You define database view A and maintenance view B in the ABAP Dictionary.

What restrictions apply to these views?

Note: There are 2 correct answers to this question.

- \* Only A can be used in the FROM clause of a SELECT statement.

- \* The join type of both A and B is an inner join.
- \* The tables joined in B must have foreign key relationships.
- \* The tables joined in A must have foreign key relationships.

**NO.65** What type of method is generated automatically by the Web Dynpro Explorer when you assign an action to a button UI element?

- \* Event handler method
- \* Supply function
- \* Standard hook method
- \* Ordinary method

**NO.66** What are some of the advantages of using Open SQL?

Note: There are 2 correct answers to this question.

- \* All standard SQL commands can be used.
- \* Syntax is checked at design time.
- \* It can be used with any supported DBMS.
- \* The application server buffer is NOT used.

**NO.67** What are some of the new features of Open SQL in SAP NetWeaver 7.5?

Note: There are 2 correct answers to this question.

- \* Full Join
- \* Intersection
- \* CASE expressions
- \* String expressions

**NO.68** You are asked to enhance the GUI status of an SAP standard application.

How do you identify which menu exit function code you can use?

- \* It starts with an ampersand (&).
- \* It starts with a dollar sign (\$).
- \* It starts with an asterisk (\*).
- \* It starts with a plus (+).

**NO.69** Which of the following statements correctly define a data object with the type of data element s\_conn\_id?

Note: There are 3 correct answers to this question.

- \* DATA gv\_id TYPE s\_conn\_id.
- \* CONSTANTS gc\_id TYPE s\_conn\_id VALUE &#8216;0400&#8217;.
- \* DATA gv\_id LIKE s\_conn\_id.
- \* PARAMETERS pa\_id TYPE s\_conn\_id.
- \* DATA gv\_id TYPE REF TO s\_conn\_id.

**NO.70** What properties will be set when you define a table type in the ABAP Dictionary?

Note: There are 3 correct answers to this question.

- \* Primary key
- \* Access mode
- \* GET/SET Parameter

- \* Line type
- \* Change document
